**Client's Notification**

Good Afternoon Chris,

**Please send the samples for case number R35559 for the Shiloh Church Road Site to a TIER IV laboratory to be procured by you** as it appears the recommended detection limit per the ORIA guidance (see above) is 1.0 pCi/L for both Ra-226 (Method 903.1) and Ra-228 (Method 904) which is a lower MDC (4.87 pCi/L) than what is offered by EPA NAREL in Montgomery Alabama.

If you have any questions please call. Thanks !
